

# Mobile Hotspot Checkout Program

Allowing library patrons access to Wi-Fi Internet

## Libraries

Manage Mobility allows libraries to lend out Internet hotspot devices to your card holders and community members.

Digital technology has changed the way our communities seek information. Libraries have offered internet access on premise for years. Now, Manage Mobility works with libraries across the country to help close the digital divide by enabling library patrons to access Wi-Fi from their homes - through the Mobile Hotspot Checkout program.

### Business Benefits

- Better services for library patrons and community through Internet access from home.
- Industry-leading Wi-Fi device staging and program support.
- Closing digital divide for students and families.

### Challenge:

Households do not have access to online resources and library provided education databases from their homes.

- 30% of US households are currently without internet
- Serving the elderly and disabled
- Job seekers without internet
- School children who cannot access the internet for homework

### Solution:

Manage Mobility delivers a completely customized support program that enables libraries to extend their reach within the community.

- Mobile broadband service
- Hotspot setup and custom staging
- Custom website for account management

### Bottom Line:

The program works to close the digital divide of those in need of school studies, job searches and more by providing wireless connectivity across the country to library members without broadband service.
