

Warehouse Installation Service

Experienced installation teams, hassle-free implementation

Custom label & sign designs

No matter if you need simple rack labels & signs or unique designs, Peak Technologies has the graphic design and production expertise to handle any needs. Our team will work with you to ensure the end product meets your precise requirements. We will provide guidance and ideas throughout the entire process. Bring us your challenges and let us guide you through the label & sign installation process.

Storage location data

As part of the implementation process, the Peak team works with your warehouse labeling location file to ensure it is properly prepared for label production. Some clients will provide us with a complete data file of labels required while others will need a location file to be created based on a rack drawing. Our team is here to help you develop the most optimal layout for your warehouse.

Warehouse installation

With all the challenges you face supporting implementation of your WMS system, why go at it alone when you can have the backing of one of the top experts in the industry? It takes time & resources to design, test, produce and install custom printed barcode warehouse labels & signs necessary for your project. With all this commitment and effort, you want the installation to be right the first time. Peak combines a thorough understanding of warehouse operations, barcode scanning and label production to help you install a customized barcode warehouse label solution. We help you work through the details of your warehouse labeling needs, so you have more time to focus on what you do best. At Peak, we realize that every installation is a custom project - variables include the facility, available staff, go live date, budget and more.

Business Benefits

- Customized solutions to support your specific warehouse needs
- Professionally designed labels and signs
- Full project management and support of all of your warehouse needs
- Maximize uptime by saving time and manpower

Initial consultation

No two warehouses are ever the same and that's why Peak begins with an analysis of your facility's needs and requirements so that we can print the labels in such a way to make the installation process most efficient. All of our warehouse signs & labels are custom designed for each specific application. We don't try to fit a warehouse to a pre-determined signage solution—we design customized warehouse signs for your needs. Don't let something as simple as poor signage stand in the way of achieving excellence for your warehouse.

Label design

Initial warehouse label concepts are designed & proofed - allowing you to fine tune the layout. We can also provide you with actual samples or prototypes (for a reasonable production cost) so you have something tangible before final sign off. We can also work with any design that you may already use.

Warehouse labeling and signage

Warehouse labeling

Rack labels	Shelf labels	Floor labels
Metal labels	Magnetic labels	Pallet labels
Freezer labels	Tote/container labels	Cover up labels

Warehouse signage
