

Give your drivers the FORGE scanner solution that maximizes productivity and reliability.

Zebra's TC58 Mobile Computer will boost your return on investment for years to come.

You rely on mobile devices to ensure your drivers' productivity every minute of the day. But when you're approaching the end of typical lease contract, the FORGE Scanners you started with several years ago might not live up to today's requirements. You could be dealing with an annoying and costly level of cracked screens, sluggish performance, diminished battery life, and balky scanning.

That makes this the perfect time to upgrade to the latest FORGE scanner solutions from Zebra.

Improve performance and reliability.

Zebra's TC58 Mobile Computer makes it easy to update technology, elevate driver productivity, and lock in your return on investment for years to come. They feature the latest processors for blazing-fast performance, a massive 6-inch high-resolution screen, increased durability, wireless charging capability, and support for 5G and Wi-Fi 6E wireless.

Most importantly, the TC58 Mobile Computer will let you put device headaches in the past and deliver years of worry-free performance. And it will do it for the same or lower monthly cost than your current devices.

Get the latest mobile technology for the same or lower cost than your current FORGE Scanner budget. Contact Peak Technologies to learn about replacing your existing devices with Zebra's TC58 Mobile Computer today.

Replace aging FORGE scanners with Zebra's latest mobile computer for the same or lower monthly cost than your current device budget.

If you're approaching the end of a three-year agreement on FORGE scanners, now is the perfect time to consider upgrading to Zebra's TC58 Mobile Computers. With the latest processors, advanced scanning capability, and greater durability, the TC58 will give your drivers years of worry-free performance and let you put device headaches behind you.

Zebra TC58 Mobile Computer

Blazing speed

Accelerate even the most demanding applications with class-leading processing power, memory, and storage.

The latest wireless connections

Give your drivers the fastest connection speeds with 5G and Wi-Fi 6E for maximum productivity and less waiting.

Industry-leading 6-inch screen

The largest, highest resolution, and brightest display in this product class works with a stylus or finger and with or without a glove.

Thinner and more rugged

An ergonomic design produced with advanced manufacturing and materials technology makes the TC58 thinner, yet more rugged and more durable.

Unmatched battery technology

Get full shift power with Zebra's PowerPrecision+ standard 4400 mAh and extended 6600 mAh batteries. Standard Warm Swap and optional Hot Swap battery modes allow more work without interruptions.

Advanced scanning capability

Boost driver productivity with split-second first-time capture of virtually any barcode with standard or extended range scanning.

Flexible charging options

A Qi-compatible battery allows you to recharge wirelessly or with an in-vehicle wireless charging cradle—no more broken pogo pins. Or use USB-C for easy charging and replacement cables.

Full range of satellite coverage

Stay connected with GPS, GLONASS, Galileo, Beidou, QZSS Dual-Band GNSS—concurrent L1/G1/E1/B1 (GPS/QZSS, GLO, GAL, BeiDou) and L5/E5a/BDSB2a (GPS/QZSS, GAL, BeiDou); a-GPS; supports XTRA.

eSim

No fumbling with sim cards.

Peak Technologies — Your FORGE Scanner Partner

For more than 35 years, PEAK Technologies has been providing rugged mobile solutions and lifecycle management services for technology such as the Zebra TC58 to companies just like yours. We make it our business to know yours. We have worked very closely with the FedEx Ground community, listened to many ISPs like you and understand FedEx Ground's functional and technical requirements. We are your one, easy to work with, and reliable source for scanning devices, cellular service, hardware/software support, warranty, and maintenance options.

Contact Peak Technologies to learn about upgrading to Zebra's TC58 Mobile Computer today.
